

John Jenkins

San Dimas, California – 1(424)212-2107 – jenkins.john2013@gmail.com

Objective

Mechanical engineering student experienced in aerospace composites manufacturing, vehicle dynamics design, robotics and controls seeking an engineering position to apply my skills, driving innovation and excellence into engineering products.

Education

California State Polytechnic University, Pomona, CA

August 2023- May 2026

- 4th Year- Bachelor of Science – Mechanical Engineering - 3.4 GPA
- Formula SAE Electric: Technical Lead- Brakes and Wheels, IAM3D Cargo Drone Payload Systems Lead, ASME Member

Santa Monica College, Santa Monica, CA, 3.62 GPA

August 2019- June 2023

Foothill College, Los Altos, CA, 4.0 GPA

August 2013- June 2015

Relevant Coursework: Vibrations, Thermal System Design, Heat Transfer, Fundamentals of Robotics, Mechatronics, Finite Element Analysis, Mechanical Measurements, Machine Design, Controls, Stress Analysis, Manufacturing Systems and Processes

Professional Experience and Projects

Senior Design- Teleoperation of 6-axis Robot Arm with Force Feedback

August 2025- May 2026

- Designed and built a delta-geometry parallel robot as a 6-DoF input device to teleoperate a Universal Robots UR3 collaborative arm with real-time haptic force feedback with a team of 3 fellow students.
- Lead control systems design including motor controls, sensors, kinematics and force feedback in Python.

Solartronics Engineering, Colton, CA

June 2025- August 2025

Battery Inspection Technician

- Performed x-ray inspection on lithium-ion battery modules, determined safety or quarantine status of modules.

Formula SAE Electric Racing Team, Cal Poly Pomona

Nov 2023-June 2025

Engineering Lead- Brakes and Wheels Subsystem

- Managed design and manufacture of wheel hub assembly, suspension upright assembly, and hydraulic braking system.
- Managed and executed welding operations and welding training for the manufacture of vehicle chassis and chassis jig.
- Performed manual 3-axis machining operations, TIG welding operations, and validated designs for critical vehicle parts.

NASA JPL Interstage Latch Machine Design Course Project, Cal Poly Pomona

Jan 2025-May 2025

- Collaborated with NASA JPL engineer to design a payload latch for a Mars Lander EDL phase from derived requirements.

Northrop Grumman, El Segundo, CA

July 2017 to September 2017

Manufacturing Engineering Intern

- Wrote and edited plans, engineering drawings and process instructions for E2-D, CRJ700 and Global Hawk programs which were approved and used in production of fiberglass and graphite composite parts and assemblies.
- Created process instructions for the operation and manufacturing processes for a DECKER D-Series foam processing machine and received approval of engineering, quality, and safety departments. This process is still in use.
- Implemented automated polyurethane foam molding process improvements for the E2-D empennage and other programs to improve speed and quality of polyurethane foam molding significantly over manual processing.

Manufacturing Engineering Intern

June 2016 to December 2016

- Assisted in development of the composite lamination process for E2-D empennage, working closely with design and manufacturing engineers to write work instructions for dozens of parts and assemblies which were approved for use.
- Created detailed visual-aid packages for dozens of critical composite parts and assemblies to guide composites technicians and improve the efficiency and quality of composite laminate manufacturing.

Awards and Honors

Pi Tau Sigma Mechanical Engineering Honor Society, Spring 2024- Delta Beta Chapter- Cal Poly, Pomona

Skills and Other

Skills: Composite Materials, Advanced Composites Manufacturing, Mechanical Design and Analysis, Design for Additive Manufacturing, Thermal Analysis, NASTRAN, FEMAP, SolidWorks, Siemens NX/Teamcenter, MATLAB, Python, CNC and Manual Mill Operation, TIG Welding, Vehicle Dynamics, Fabrication, Project Leadership, First Principles, Self-starting, Motivated

Certifications: CWSA SolidWorks Mechanical Design Certificate, 2022
